

■ PathFundAI

AI-Powered Career Roadmaps, Funding Proposals, and Blockchain Credentials

■ Summary

PathFundAI helps students plan, track, and fund their educational journeys. Using Gemini AI, the system builds personalized MDC-based career pathways and generates professional funding proposals. As students complete milestones, Solana NFTs verify achievements as “Proof of Completion.” Everything is displayed in an interactive timeline within a personal dashboard.

■ Key Features

- **AI Career Roadmap (Gemini):** Generates MDC-aligned pathways with degrees, certifications, and timelines.
- **Interactive Timeline UI:** Displays milestones visually and tracks progress.
- **Blockchain Credentials (Solana):** Mints NFT badges as verified proofs of achievement.
- **Scholarship Matching + Grant Automation (ENTEC):** Suggests scholarships and drafts proposals from RFPs.
- **User Profile & Progress Storage:** Saves timelines, NFTs, and proposals in a personal account.

■ ■ Technical Requirements

Layer	Technology	Purpose
Frontend	React + Tailwind (Cloudflare Pages)	Dashboard + Timeline UI
Backend	Cloudflare Workers	API for Gemini & Solana integration
AI Engine	Google Gemini 1.5 Pro	Pathway + Proposal generation
Blockchain	Solana Web3.js + Phantom	NFT credential minting
Storage	Cloudflare KV/D1	User + Proposal data cache

■ Sponsor Requirements

- **Miami Dade College:** Generates MDC-based educational roadmaps.
- **ENTEC:** Converts scholarship RFPs into structured, professional proposals.
- **Solana:** Issues NFT credentials for completed milestones.
- **Gemini API:** Powers AI reasoning for pathways and proposals.
- **Cloudflare (optional):** Enables serverless deployment and caching for scalability.

■ Impact

PathFundAI connects education, funding, and verification in one platform—giving students clear direction, measurable progress, and AI-generated access to scholarships and grants.

Pitch: “Plan your future, prove your progress, and fund your dreams—with PathFundAI.”
